Retrospective and Action Plan
Sprint 18

Sprint Velocity

- Number of story points completed in one Sprint 4/2 - 4/8
  - Velocity = 47

What did we do well?

- Jason: Have a set plan for the upcoming final month of our project
- Gio: We were able to meet up during spring break and I was able to complete work items faster since I did not have to worry about other assignments for other classes anymore.
- Jesus: I got more done than expected, Got a substantial amount of work done
- Rainier: Finished LLDs for Inventory management.
- Vi: Finished most of assigned tasks

What could we improve on?

- Jason: Completing my own tasks
- Gio: Even if I'm able to work longer on work items I still won't have enough hours to put in to reach my deadline for code review.
- Jesus: Was unable to finish teammates peer review, was unable to put in work where I should have
- Rainier: I could personally finish more stuff this week.
- Vi: Need to pay more attention to assign tasks since I was missing some stuff that I needed to work on

How do we fix it?

- Jason: Plan through this week on what i am going to be doing and breakdown tasks
- Gio: I should have planned 2 or 3 sprint meetings ahead of my code review in order to see and spread the work items and have them done in a manageable time.
- Jesus: I believe I should add some previously removed items to our sprint planning, such as Rental car fleet, for the sake of learning how to use front end tools. Near the end of the sprint, I ran into problems I believe should have been simple, such as adding an event listener to a button, but I somehow couldn't solve them
- Rainier: Sleep less and work more.

Retrospective and Action Plan
Sprint 18
- Vi: Pay more attention during meeting

Action Plan

Here are the previous goals for the past sprint:
- **Goals for Sprint 18:**
    1. Have a velocity around our average of 60
        - Ensure we are doing to average velocity each sprint

Based on our previous Sprint, we didn't get to the average velocity needed for this sprint. In order to fix this, and make sure we meet our deadline by our next Team Review meeting, we need to meet the following goals:
- **Goals for Sprint 19:**
    1. Finish the Car Health Rating and CNC features by 3/15
        - Ensure we are completing features on time for our milestones
    2. Ensure we are completing at least our average of 60 velocity this sprint
