What did I do yesterday?	Finished creating the target layer with DYC and ran test to see if they are successfully retrieving from the database. Also found out that I wont need to go into the database to get the make model and year of the vehicle and grab them from session storage. Created the entrypoint but have not worked on it.
What am I doing today?	Working on the entrypoint by creating the controller and adding services to the program.cs. If I manage to complete the entry will move on to the Front-End.
